Timelock-Recovery Cancellation Guide

Electrum Version: 4.5.8 - Plugin Version: 0.1.0

This document is intended solely for the eyes of the owner of wallet: My Trezor Safe 3. The Recovery Guide (the other document) will allow to transfer the funds from this wallet to a different wallet within 3 days. To prevent this from happening accidentally or maliciously by someone who found that document, you should periodically check if the Alert transaction has been broadcast, using a Bitcoin block-explorer website such as:

https://mempool.space/tx/8b1a59ba445220d70bb3a5bdc9dd44515f885509e9631fe409a024c483ed73b0

https://blockstream.info/tx/8b1a59ba445220d70bb3a5bdc9dd44515f885509e9631fe409a024c483ed73b0

It is also recommended to use a Watch-Tower service that will notify you immediately if the Alert transaction has been broadcast. For more details, visit: https://timelockrecovery.com .

In case the Alert transaction has been broadcast, and you want to stop the funds from leaving this wallet, you can scan the QR code on page 2, and broadcast the content using one of the following Bitcoin block-explorer websites:

• https://mempool.space/tx/push
• https://blockstream.info/tx/push
• https://coinb.in/#broadcast

If the transaction is not confirmed within reasonable time due to a low fee, you will have to access the wallet and use Replace-By-Fee/Child-Pay-For-Parent to move the funds to a new address on your wallet. (you can also pay to an Acceleration Service such as the one offered by https://mempool.space)

IMPORTANT NOTICE: If you lost the keys to access wallet My Trezor Safe 3 - do not broadcast the transaction on page 2! In this case it is recommended to destroy all copies of this document.
